BEGONIA—Rex, Tuberous, Fibrous, Hybrid.  
EASTER LILIES—Finest Croft, Croft Special  
HARDY GARDEN LILIES

Gentlemen:

We have some very nicely shaped Rex Begonias ready 3", 4" and 5" pots for immediate shipment. They are taking on their spring colors and will make excellent pot plants or combination dish gardens for spring sales. Have thousands of smaller plants coming along for future delivery and have a fine selection of colors now and for future delivery. They come in a multitude of color variations and combinations from pure silver to black with red and green and purple combinations on flat and spiral leaves. They are \$20. per 100, 50 at 100 rate, in lots of 500 or more they are \$17.50 per 100 F.O.B. Harbor, Oregon, via express, 25 plants via express \$5.00. 25 plants prepaid parcel post \$7.50.

Have some very lovely plants of Rex Begonia Seedlings that are not named, at \$15. per 100, 50 at 100 rate. F.O.B. Harbor.

In STAR and Rhizomatous types of Fibrous we will have stock for sale in March and April and later in spring and early summer. As a few greenhouses want Double Semperflorens we will propagate them on order only so please send your order about 2 months before you plan to receive the plants.

How is your Croft Lily Bulb supply for this spring? We have a few cases in cold storage here that we are offering at greatly reduced prices as follows:

1 case 200 7-8"	\$38.00
10 cases 7-8" 250 bulbs per case	\$45. per case
5 cases 8-9" 300 bulbs to case	\$60. per case
1 case 9-10" 150 bulbs to case	\$55. per case
1 case 10-11" DN. giving 2 stems per bulb	lots of our customers prefer these double nosed bulbs to the single nosed ones.

We are NOT selling to Geo. J. Ball, Inc. this coming fall so we are free again to sell directly to the greenhouses so please place your order early with us and take advantage of better prices direct to the greenhouse from the grower.

We have in cold storage here some of the very finest Speciosum Rubrum stock that money can buy. They are our Speciosum Hybrid Seedlings giving larger flowers, higher bud count, and in many cases darker flowers than regular strains of Rubrum. They are ready for immediate delivery.

8-9" \$30. per 100	\$54. per case 180 bulbs	11-12" \$60. per 100	\$32.40 per case 54 bulbs
9-10" \$40. per 100	\$52. per case 130 bulbs	12" up	\$70. per 100 \$31.50 45 bulbs case
10-11" \$50. per 100	\$40. per case 84 bulbs		

Also have American Grown commercial strains Speciosum Rubrum at above prices.  
YELLOW CALLAS and YELLOW BLACK THROAT CALLAS

1 1/2-2" \$10.00 per 100	available in Yellow Black Throat only
2-2 1/2" \$17.50 per 100	\$165. per 1000
2 1/2-3" \$27.00 per 100	\$250. per 1000
3" up	\$35.00 per 100

REX BEGONIA SEED--Hand pollinated on our best Rexes 50¢ per packet \$1. Trade Packet  
SMALL LEAVED AND NEW REX BEGONIAS--Have limited stock ready now and more coming  
\$30. per 100, 50 at 100 rate. in 500 lots \$25. per 100, 25 postpaid \$10.00.  
Thanks for your orders.

Leslie Woodriff

HELEN LEWIS

HELEN LEWIS is the loveliest Rex Begonia we grow and is our best seller. We finally have enough stock to offer it as a separate variety. Its medium large leaves are purple black with a wide zone of silver in center of leaf with lavender rose overlay. Wonderful contrast to the silver or green leaves usually found in begonia collections. \$20.00 per 100, 50 at 100 rate, 25 \$5.50 via express f.o.b. Harbor, Oregon. 25 plants prepaid parcel post \$7.50 though we not suggest parcel post shipments to the east during this cold weather.

CONTINUATION

the same for each of the three types of chocolate. The first type is the standard type of chocolate, which is made from the finest quality of cacao beans. The second type is the "Specialty" type, which is made from a blend of cacao beans and other ingredients. The third type is the "Gourmet" type, which is made from a blend of cacao beans and other ingredients, including nuts and dried fruits. The "Specialty" type is the most expensive, followed by the "Gourmet" type, and then the standard type. The price per pound for each type is as follows:

In S.T.R. and R.H.C. the price is \$1.50 per pound for each type. In H.C. the price is \$1.25 per pound for each type. In G.C. the price is \$1.00 per pound for each type. In G.M. the price is \$0.80 per pound for each type. In G.O. the price is \$0.60 per pound for each type. In G.P. the price is \$0.40 per pound for each type. In G.S. the price is \$0.30 per pound for each type. In G.F. the price is \$0.20 per pound for each type. In G.B. the price is \$0.10 per pound for each type.

How much chocolate will you need? To calculate the amount of chocolate needed, multiply the number of pounds required by the price per pound. For example, if you want to buy 10 pounds of S.T.R. chocolate at \$1.50 per pound, you would need 15 pounds of chocolate. If you want to buy 5 pounds of H.C. chocolate at \$1.25 per pound, you would need 6.25 pounds of chocolate. If you want to buy 3 pounds of G.C. chocolate at \$1.00 per pound, you would need 3 pounds of chocolate. If you want to buy 2 pounds of G.M. chocolate at \$0.80 per pound, you would need 1.6 pounds of chocolate. If you want to buy 1.5 pounds of G.P. chocolate at \$0.60 per pound, you would need 0.9 pounds of chocolate. If you want to buy 1 pound of G.S. chocolate at \$0.40 per pound, you would need 0.4 pounds of chocolate. If you want to buy 0.5 pounds of G.F. chocolate at \$0.20 per pound, you would need 0.1 pounds of chocolate. If you want to buy 0.25 pounds of G.B. chocolate at \$0.10 per pound, you would need 0.025 pounds of chocolate.

It is also important to note that the price of chocolate may vary depending on the type of chocolate and the source of supply. For example, the price of S.T.R. chocolate may be higher in some areas than in others. It is also important to consider the quality of the chocolate, as well as the price. The quality of the chocolate can affect its taste and texture, as well as its nutritional value. Therefore, it is recommended to purchase chocolate from a reputable source, such as a grocery store or a specialty shop.

How many calories are in a serving of chocolate? The calorie content of chocolate varies depending on the type of chocolate and the size of the serving. For example, a single square of S.T.R. chocolate contains approximately 150 calories. A single square of H.C. chocolate contains approximately 125 calories. A single square of G.C. chocolate contains approximately 100 calories. A single square of G.M. chocolate contains approximately 80 calories. A single square of G.P. chocolate contains approximately 60 calories. A single square of G.S. chocolate contains approximately 40 calories. A single square of G.F. chocolate contains approximately 30 calories. A single square of G.B. chocolate contains approximately 20 calories.

What is the best way to store chocolate? Chocolate should be stored in a cool, dry place, away from direct sunlight and heat. It is also important to keep chocolate away from moisture, as it can cause it to melt or become soft. It is recommended to store chocolate in a sealed container, such as a plastic bag or airtight jar, to prevent it from absorbing moisture. It is also important to avoid storing chocolate in the refrigerator, as it can cause it to become too cold and lose its texture and flavor.

## CHOCOLATE

Chocolate is one of the most popular confections in the world. It is made from cacao beans, which are harvested from the cacao tree. The beans are dried, then roasted and ground into a paste called chocolate liquor. This liquor is then combined with sugar, milk, and other ingredients to create different types of chocolate, such as milk chocolate, dark chocolate, and white chocolate. Chocolate is a rich, indulgent treat that is enjoyed by people of all ages. It is often used in baking, as well as in desserts like truffles and brownies. Chocolate is also a popular gift item, and is often given as a present for birthdays, anniversaries, and other special occasions.
